Ryan Koch

SKILLS

6+ years of experience programming in languages including JavaScript, TypeScript, Ruby, and Python

Created and supported web and mobile applications using frameworks such as React, React Native, Ruby on Rails, and Angular (Github here)

Well acquainted with enterprise and development tools such as JIRA, Slack, Coda, Figma, GSuite, Microsoft Office, Git, VSCode, VirtualBox, XCode, and Android Studio

EXPERIENCE

Indicio, San Diego, CA — *Mobile Engineer*

July 2021 - PRESENT

- Design and develop scalable, production mobile applications using React Native
- Collaborate and contribute to open-source projects alongside government organizations and the Linux Foundation to advance technology in digital identity and verifiable credentials
- Work with customers to brainstorm and implement new features, provide support and implement feedback, as well as make updates and deployments to the App and Play stores

DoctorMultimedia, San Diego, CA — *Web Developer*

January 2020 - October 2021

- Used web design skills to help our customers best represent themselves to potential and returning customers
- Implemented SEO strategies to improve customer reach and discoverability
- Managed tasks in a ticket managing system, prioritizing them by urgency and turn-around time

The VanLife App, San Diego, CA — *Mobile Development Intern*

SEPT 2020 - December 2020

- Along with the other intern, had ownership over the renovation of the team's admin dashboard
- Learned and worked independently to get up to speed with the Angular framework and Firebase/Firestore back-end

24-7intouch, Orlando, FL — *Quality Manager*

JAN 2017 - FEB 2020

- Oversaw a department of over 100 employees, gauging department metrics and developing trainings to improve performance and morale
- Implemented new processes and coaching techniques that decreased QA errors by 62% within 6 months

EDUCATION

LEARN Academy, San Diego, CA —*Full Stack Web Development Bootcamp 2020*
